FIG.	PART NO.	DESCRIPTION OF PART	NO. REQ.
1		Battery Power Head Cover	(1)
2b	06-82-1076	M4 x 16mm Pan Hd. Tapitite T-20 Screw	(27)
2c	06-82-1076	M4 x 16mm Pan Hd. Tapitite T-20 Screw	(8)
3		Rubber Bumper	(2)
4		Power Head Housing	(1)
5		Battery Interface - Left	(1)
6		Battery Interface - Middle	(1)
7		Battery Interface - Right	(1)
8		Back Mower Housing	(1)
9		Power Cable Strain Relief	(1)
10		Top Cover Torsion Spring	(1)
11		Top Cover Hinge Pin	(1)
12		Flat Washer	(2)
13		Fuel Power Lens	(1)
14		Lens Plate	(1)
15		Fuel Gauge PCBA	(1)
16	06-82-0276	M3 Pan Washer Hd. ST Phillips Screw	(2)
17		Hinge Containment Tab	(2)
18	05-81-1195	M3 x 8mm Pan Hd. SP T-10 Screw	(8)
19	31-44-0219	Rear Deck Lift Handle	(1)
20		Boat Securing Bracket	(1)
21c	05-81-0005	M3 x 11mm Pan Hd. Tapitite T-10 Screw	(4)
22		Main PCBA	(1)
23	31-44-0221	Front Deck Lift Handle	(1)
24		Front Mower Housing	(1)
25		Headlight Assembly	(1)
26		Front Shaft Mount	(2)
27	05-71-0017	M4 x 10mm Pan Hd. ST T-20 Screw	(5)
28		3/16" Wire Clip	(15)

FIG.	PART NO.	DESCRIPTION OF PART	NO. REQ.
29	05-88-1100	M3 x 10mm Pan Washer Hd. ST T-10 Sc.	(15)
30	16-01-0072	Motor	(1)
31	05-55-0022	M5 Hex Nut with Nylon Insert	(4)
32		Sidelight Assembly-Left	(1)
33		Right Sidelight Housing	(1)
34		Height Adjustment Backstop	(1)
36		M8 Square Nut	(1)
37		Rear Guard	(1)
38	05-74-0246	M6 x 16mm Pan Hd. T-30 Mach. Screw	(7)
39		Left Sidelight Housing	(1)
41	05-78-0032	M5 x 13mm Pan Hd. T-25 Mach. Screw	(4)
42		Wire Cover	(1)
43		Mower Deck	(1)
44	31-44-0004	Blade Motor Housing	(1)
45		Flat Washer	(4)
46	05-74-0242	M6 x 25mm Pan Hd. T-30 Mach. Screw	(4)
47	45-94-0084	Plastic Wheel Cap	(2)
48	05-55-0158	M10 Hex Nut with Nylon Insert	(2)
49		Front Wheel	(2)

FIG.	PART NO.	DESCRIPTION OF PART	NO. REQ.
50		Front Axle Weldment	(1)
51		Front Axle Mount Plate	(2)
52	05-74-0243	M5 x 44mm TH T-25 Machine Screw	(4)
53		Front Deck Baffle	(1)
54		Fan Spacer	(1)
55		Blade Motor Fan	(1)
56		21" Lawn Mower Blade	(1)
57	28-20-0102	Shear Plate	(1)
58		Blade Washer	(1)
59	44-40-0027	M12 Flange Nut	(1)
61		Rear Discharge Baffle	(1)
110b	05-74-0244	M8 x 20mm BUWH Hex Recess Screw	(3)
128		Sidelight Assembly-Right	(1)
130		Cord Clamp	(1)
139	05-74-0245	M6 x 10mm Pan Hd. Hex Recess Mach.	(1)
142		Rear Guard Plate	(1)
144	19-98-0163	Fuel Gauge Decal	(1)
147	10-20-7266	2 Battery Decal	(1)
200	14-50-0053	Mower Chassis and Motor Assembly	(1)
201	14-46-0408	LED Worklight Assemblies	(1)
202	28-41-0033	Front Wheel Assembly (Set of One)	(2)
203	42-14-0029	Baffle Assembly	(1)
204	28-50-0019	Front Housing Assembly	(1)
205	44-81-0014	Battery Rail Assembly	(1)
206		Main PCBA Service Kit	(1)
207	42-12-0024	Front Axle Service Kit	(1)
208	28-41-0018	Rear Guard Service Kit	(1)
209	22-84-0017	Blade/Motor Fan Service Kit	(1)
210	14-38-0113	Power Head Cover Assembly	(1)

FIG.	PART NO.	DESCRIPTION OF PART	NO. REQ.
35b	05-74-0241	M8 x 16mm Pan Hd. T-40 Mach. Screw	(10)
40	-----	Deck Height Adjustment Spring	(1)
43	-----	Mower Deck	(1)
47	45-94-0084	Plastic Wheel Cap	(2)

*Indicates Critical Torque

Wire Routing for Switch Cable

Secure the Switch Cable with three Cable Clips, as shown.

Secure the Switch Cable with Wire Clip as shown. Route Switch Cable through the rectangular opening of the Handlebar Mounting Bracket.

Plug the connector of the Switch Cable into connector from the Main PCBA. Secure Switch Cable with a Cord Clamp and two screws.

Wire Routing for Front LED Lights and Blade Motor

Route wires for the front LED lights as shown. Be sure to place wires completely in the bottom of all wire traps. Secure front LED light wires with 12 wire clips and screws.

Route wires from front LED lights and blade motor through hole here. Fasten wires together with wire tie.

Wire Routing for Side Lights and Drive Motor

Route the wires for side LED lights and drive motor through hole here, with the left LED wire and the motor wire through the hole directly.

The right LED wire needs to cross the rear baffle then go through the hole.

Cross the wires through the plastic part and place the wires between PCBA plate and screw boss for securing bracket.

Wires for side lights and drive motor

Boat securing bracket

Wire Routing for Main PCBA

Before plugging connectors, orient and place the sensor in the area shown.

Place the connectors for the lights and motors on the side of the PCBA boat shown.

Plug connectors for lights and motors into the connectors from the PCBA in the order of the smallest to the largest.

There are two connectors left unplugged, one will be connected with the fuel gauge connector and the other will connect to the switch connector.

Join this Connector to the Fuel Gauge Connector

Make sure that no wire crosses over this blue wire when fastening the small PCB plate.

SEE NEXT PAGE FOR LUBRICATION AND HOT MELT GLUE APPLICATION PROCESSES RELATING TO THIS CONNECTOR

Join this Connector to the Switch Connector

PROCEDURAL OVERVIEW
Surface prep and glue

Equipment

1. Sure Bonder (PRO9700A)
- Adjustable Temp Glue Gun
2. Element HMS707 (Hot Melt Glue)
3. Cleaning Pads
4. Isopropyl Alcohol
5. ESD Bracelet

Procedure

 ESD Protection must be worn in this station.

 1. Sure Bonder (PRO9700A) Adjustable Temp Glue Gun Settings:
 • Temperature Setting is 320°F.
 • Trigger Pull is set to Full Stroke (Approx. 1").

2. Locate and Clean the connector location with an Isopropyl wipe. Remove excess Dielectric Grease.

3. Wipe Excessive Dielectric Grease off the connector on all 4 sides with an alcohol wipe.

- a. Take one wipe per mower
- b. Soak wipe with alcohol
- c. Use wipe to remove excess Dielectric Grease from 4 sides of connector
- d. Discard wipe after each mower

 4. Push Connector in with ~5lbf of force

 5. Visually inspect that connector is properly seated - check for connector damage

6. Use PRO9700A Glue Gun to Apply Hot Melt to harness and connector

 7. Apply 1st Trigger Stroke (~5 Seconds) starting at the wire harness and working in an arcing motion (back and forth) towards the base of the connector

8. Pause to allow for slight cure (~ Seconds)

 9. Apply 2nd Trigger Stroke (~ Seconds) repeating the process for Step 4

 a. **Work to encapsulate the entire connector with Hot Melt**

 10. Inspect Glue application after 30 Second Cure
 a. Ensure Connector and Harness are encased in Hot Melt

Metal must be in contact with skin.
 Technician must stand on mat.
